

Counterfeit Buster™

New! Sure 'N Fast "Counterfeit Buster" Detector Pen!

The New "Third Generation" Counterfeit Currency Detector Pen!

This New "Third Generation" Counterfeit Bill Detector Pen created by "Sure 'N Fast" (a division of Clarence J. Venne, LLC) detects counterfeit inks on washed or bleached treasury paper bills and other types of paper which counterfeiters are currently using, including coated bills!

Simply remove the cap from the Sure 'N Fast "Counterfeit Buster" Detector Pen, lightly press down on the applicator and rub the applicator over the **Black Round "United States Treasury Reserve System" seal** on the **front left side of any paper currency bill** several times you can tell if the currency is real or counterfeit. **If the paper currency bill being tested is counterfeit**, the ink of the seal will smear immediately and the paper may fray as well. No clean up of applicator is necessary.

The Sure 'N Fast "Counterfeit Buster" Detector Pen is good for testing over 2,000 bills!

The New Sure 'N Fast "Counterfeit Buster" Detector Pen is economical and easy to use. The applicator will not dry out even if you lose the cover, it is non-toxic, and is effective on most all paper counterfeit bills currently in circulation. Sure 'N Fast "Counterfeit Buster" Detector Pens will not harm good currency.

The New Sure 'N Fast "Counterfeit Buster" Detector Pen is highly accurate and substantially more effective than the current counterfeit detector pens. Protect yourself and your business today!
